# 73x revenue growth since CY22 and 30x more customers

Recognised revenue by stream (₹ Cr), case-history years

Customers and average revenue per customer (₹ lakh)

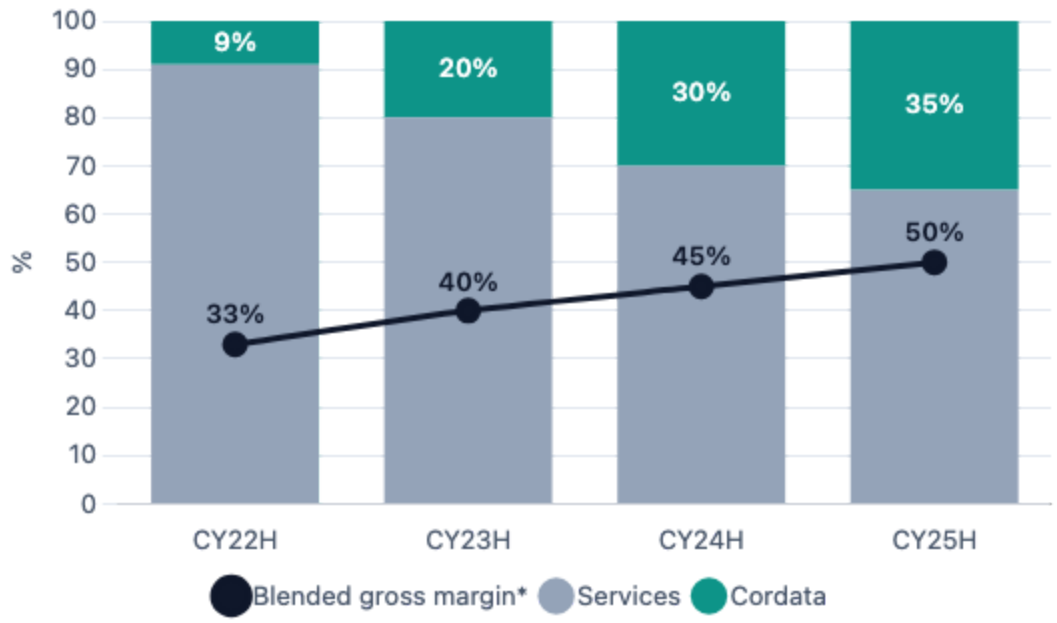

317% revenue CAGR from CY22H (₹0.44 Cr) to CY25H (₹32 Cr); CY25H alone grew 2.9x.

120 customers, including 40+ enterprises and 2 public-sector clients (BEL and ONGC); BEL moved from pilot to a multi-year contract.

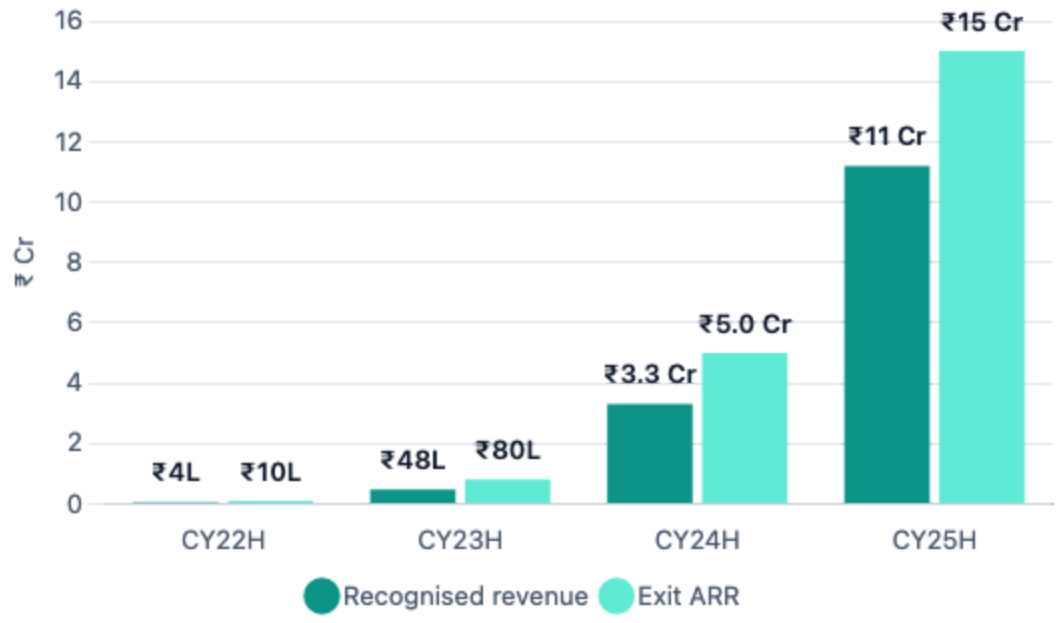

Customer-funded growth, supplemented by ₹75 lakh of angel capital: ₹0.93 Cr total capital invested (₹0.75 Cr external, ₹0.18 Cr founders).

# Cordata is raising the share of recurring, higher-margin revenue

Revenue mix (% of recognised revenue) and blended gross margin*

Cordata: recognised revenue vs exit ARR (₹ Cr)

Cordata is 35% of recognised revenue in CY25H, up from 9% in CY22H.

Blended gross margin* rose from 33% to 50% as Cordata (78%*) outpaces services (35%*).

CY22H: ₹4L* recognised software revenue against ₹10L exit ARR. CY25H: ₹11.2 Cr recognised, ₹15 Cr* exit ARR.

Gross margin by stream is a management allocation*: services = delivery team and pass-through cloud cost; Cordata = hosting, support and customer success.

# Customer #1 saves ₹32L a year on a ₹6L subscription: 5.3x

### Customer #1 case study

**Automotive components manufacturer** (name withheld) ran workloads on AWS and Azure with limited visibility into usage and spend. Sacrum ran a cloud assessment and cost-optimisation exercise, then piloted Cordata.

**₹32L**
saved every year

**18%**
lower cloud spend

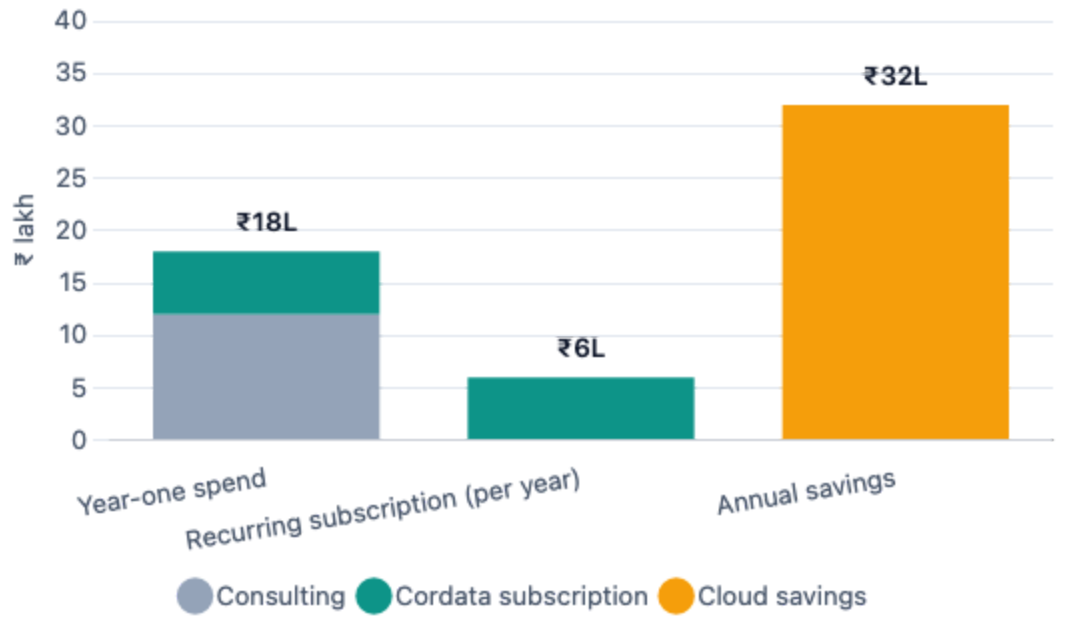

**200+**
idle resources removed

**75%**
less monthly reporting effort

Annual savings are 5.3x the recurring ₹6L subscription. Year-one spend of ₹18L is recovered in about 7 months if savings accrue evenly.

Source: Sacrum engagement records.

### What the customer pays vs what it saves (₹ lakh)

Savings per rupee of recurring subscription: ₹32L ÷ ₹6L = 5.3x.

Year-one spend of ₹18L (₹12L consulting plus ₹6L subscription) compares with ₹32L annual savings: 1.8x savings-to-spend, or ₹14L net savings after year one.

Cordata gives the customer one view of utilisation and spend across AWS and Azure, which cut monthly reporting effort by 75%.

# CY25H ₹32 Cr to CY28E ₹147 Cr, built from customer, contract and sales-capacity drivers

Revenue bridge CY25H to CY28E (₹ Cr); forecast items shaded lighter

Operating drivers by year (forecast columns shaded; all forecast values are placeholders*)

| | CY25H | *CY26E* | *CY27E* | *CY28E* |
|---|---|---|---|---|
| Customers, year-end | 120 | *154* | *210* | *283* |
| Avg revenue per customer (₹ lakh) | 26.7 | *33.2* | *42.3* | *52* |
| New enterprise logos | — | *40* | *60* | *75* |
| Annual revenue equivalent per new logo (₹ lakh) | — | *35* | *40* | *45* |
| Qualified opportunities needed at 25% win rate | — | *160* | *240* | *300* |
| Quota-carrying reps | — | *5* | *8* | *10* |
| Net revenue retention | — | *110%* | *113%* | *114%* |
| Revenue per employee (₹ lakh) | — | *36* | *38* | *40* |
| Headcount | 95 | *142* | *234* | *368* |
| Blended gross margin | 50% | *53%* | *58%* | *61%* |

Growth of 60%, 74%, 65% (CY26E to CY28E) comes from 175 new enterprise logos, 110% to 114% net revenue retention and ₹21 Cr cumulative PSU and overseas revenue*.

ONGC contract: ₹3.5 Cr total contract value over 3 years, ₹1.2 Cr a year, about ₹1.5 Cr recognised and ₹2 Cr backlog*. Only the annual amount counts as revenue.

Public-sector wins depend on meeting each tender's technical and financial criteria; startup recognition (DPIIT) gives access to GeM and CPPP and some relaxations, not automatic eligibility.

# ₹25 Cr supports a 24-month expansion plan; forecast EBITDA stays positive*

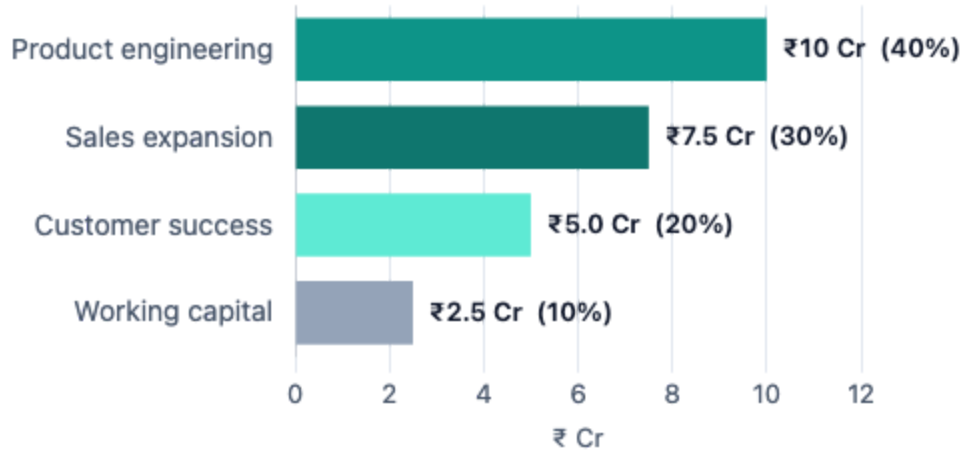

**₹0.93 Cr**
Total capital invested: ₹0.75 Cr external angel + ₹0.18 Cr founders

**₹3.2 Cr***
CY25H EBITDA (10% margin)

**₹3 Cr***
CY22H-CY25H cumulative EBITDA; total capital invested was ₹0.93 Cr

**~27 months***
Runway including ₹2.5 Cr current cash; planned raise deployment is 24 months

### Use of funds (₹25 Cr pre-Series A round)

### 24-month milestones (assumes close by Dec 2026)

**Months 0 to 6**
Close the round and hire about 25 priority roles across engineering, sales and customer success; AI recommendations in beta.

**Months 6 to 12**
Delhi, Bengaluru and Hyderabad sales teams live; target about 210 customers, ₹89 Cr CY27E revenue and 234 employees by year-end*.

**Months 12 to 18**
Predictive governance and FinOps automation released; Middle East and Singapore pilots begin.

**Months 18 to 24**
Cordata at 55% of revenue, about 283 customers, 368 employees and CY28E EBITDA margin 8%*; ready for Series A.

Why raise while profitable: ₹22.5 Cr of product, sales and customer-success spend lands ahead of revenue, so CY27E EBITDA margin drops to about 1%*.

Payment cycles: ₹8 Cr of PSU revenue in CY28E at about 110 days to collect ties up ~₹2.4 Cr; the ₹2.5 Cr working-capital line covers this modeled receivable need*.

Pipeline: CY27E target new-business value of ₹31 Cr implies about ₹93 Cr of qualified pipeline at 3x coverage*; this is a target, not current pipeline.
